April 19, 2016

Dear international student,

On behalf of Student Health Services, I want to welcome you to Slippery Rock University. We are looking forward to meeting you and providing health care to you while you are a student.

Health care in the United States may be different than health care in your country. During your orientation you will meet Student Health Services staff and learn about what health services are available at the University. We know that it can be confusing and we are here to help you!

Your health and immunization history is important! The information contained in these forms allows Student Health Services to provide the best possible care to you. Before you arrive on campus, you must follow the link to <https://studenthealthportal.sru.edu> and complete the required information. Your SRU user ID will connect you to this online environment. The information contained in these forms allows Student Health Services to provide the best possible care for you.

The following health forms should be submitted 2 months BEFORE you arrive at Slippery Rock University:

- Health History Form
- Immunizations
- Tuberculosis Screening Questionnaire
- The High Risk TB Screening Form completed by your physician

Thank you for promptly submitting your forms.

Sincerely,

Kristina Benkeser MSN CRNP
