

I am The ROCK

Stacey Booth

Job: Administrative assistant to the dean in the College of Health, Environment and Science.

Joined SRU: March 1978.

Background: I started half-time in the departments of chemistry and philosophy and then moved to the physics department full time, which shared office space with chemistry. When I had my first child, I had an opportunity to move to the geology department and work 10 months, which allowed me to spend time with my children during the summer. When the colleges were reorganized, I moved to the Dean's Office.

Interests: Reading and working on our family history through ancestry.com. I also enjoy traveling and hope to take at least one nice vacation every year when I retire at the end of next summer. I'm also working on winning the HGTV Dream Home, specifically the beach house, someday.

Person (s) I would like to have dinner with: I wouldn't mind having dinner with Rod Stewart since he canceled his show in Las Vegas that I was to attend.

Why I work at The Rock: When I started here, I didn't intend to stay, but I enjoyed working with the students. It also gave me an opportunity to take classes and learn a variety of things from the different departments I worked with. It is amazing what you can learn just from typing tests, lecture notes and listening to faculty talk.
