

I am The **ROCK**

Robert Buck

Job: Professor of mathematics

Joined SRU: 1984.

Background: I received my bachelor's degree from Georgetown University, my master's degree from the University of Dayton and my doctorate from the University of Pittsburgh. I have been married 47 years; have five children and 12 grandchildren. I developed the actuarial and statistics programs at SRU and have served four terms as department chair.

Person(s) I'd like to have dinner with: Felix Hausdorff, one of the founders of modern topology.

Why I work at The Rock: I like working with the students and the opportunity to help develop programs that allow them to attend graduate school and/or pursue careers they find interesting. It is gratifying to hear back about their success.
