Liberal Studies Requirements:

Some liberal studies courses can be used in the Elementary Education program. Other courses are particularly well suited for the kinds of content knowledge for teaching that elementary school teachers must have. Please consult with your advisor to choose carefully and productively from among your liberal studies choices.

Specific courses that can be used as goal and enrichment courses within each block are listed in the Liberal Studies guidesheets, in each semester's registration pamphlet, and on SRU's web page. Your **Degree Audit Report** is useful for determining which courses you have taken that meet liberal studies requirements, and which requirements you still need to satisfy. The DAR is the final determiner of your eligibility for graduation.
