Environmental and Occupational
Health

ABOUT THE PROGRAM

Are you about to graduate or currently working and thinking of a graduate degree in Public Health? The MPH program at SRU is the place for you. Our program is fully accredited by the Council on Education for Public Health (CEPH).

We offer 100% online Master of Public Health program. The SRU MPH program is practitioner-based and we prepare our students for leadership positions in Public Health.

The SRU MPH program requires a practicum field experience requiring students to further develop relevant skills in an applied setting. The knowledge and skills learned enable graduates to address public health issues at the community, institutional, and societal levels.

PROGRAM GOALS

- Train students and professionals in a flexible online curriculum with the knowledge and skills to promote a healthy lifestyle, prevent diseases and support environmental health in our communities
- Promote faculty and student research that address the public health needs of all populations including those at-risk and from underserved communities
- Encourage and support faculty and students to participate in community-engagement services that eliminate health disparities, environmental inequities, and promote health and wellness among individuals and populations

PROGRAM HIGHLIGHTS

- 100% online - get your degree without relocating to Pennsylvania
- Network with fellow students through group activities
- Exposed to the field by dedicated and experienced faculty members
- Skills and knowledge to complete the Master Certified Health Education of Specialist (MCHES), Certified in Public Health (CPH), Industrial Hygienist (CIH) certifications (assuming all other certifications requirements have been met)

PROGRAM OPPORTUNITIES

Upon graduation, a student within the "Environmental and Occupational Health" concentration will be able to:

- Articulate many of the sources of biological, chemical and physical agents found in environmental matrices of water, air, soil and food
- Adhere to ethical guidelines regarding environmental and occupational health
- Examine the role of risk assessment paradigms in creating safe environments, including target populations exposed to hazardous agents
- Communicate approaches to the prevention and control of the major diseases caused by environmental hazards
- Demonstrate an understanding of the regulatory framework and policy at the local, state, and federal levels for controlling exposure to or release of environmental contaminants

ADMISSION REQUIREMENTS

All applicants must submit the following materials along with a completed online graduate application and non-refundable application fee:

- All prerequisite courses must be completed with a grade of C or better, prior to submission of application.
- Official undergraduate degree transcript(s) and any graduate transcripts.
- A minimum of a 3.0 cumulative GPA in an undergraduate major.
- Previous completion of a statistics course and either one social science or one natural science course.
- Personal statement indicating career goals and personal philosophy related to interest in Public Health.
- One electronic recommendation form that addresses the applicant's capacity for graduate level work.

In the United States, between 2020 and 2030, the MPH-occupations are projected to add about 118,449 jobs to the Economy (EMSI).

According to the Bureau of Labor Statistics, healthcare occupations and those related to healthcare are projected to account for 18 of the 30 fastest growing occupations.
