SUSTAINABILITY COURSES in the Academic Year 2016/17

- An introduction to methods for enhancing sustainability in social and physical planning for rural areas, towns, and cities. (UG)
- Students in this course will discuss the economic, environmental and social sustainability challenges facing the hospitality, event management and tourism industry. (UG)
- Students will explore and evaluate geographic and environmental ideas from western and non-western cultures, and different geographic regions with a quantitative focus. (UG)
- Encourage those interested in the rhetoric of science, nature writing, and environmentalism to pose informed questions regarding environmental education. (UG)
- An introduction to ecological principles and concepts with an examination of the biological, physical, and human factors influencing ecosystems. (UG)
- The most common ethical issues in international business involve: employment practices, human rights, environmental protection, and the global economy. (UG)
- The use of aquatic organisms to monitor water quality. Best practices for reducing water pollution. (UG)
- Interdisciplinary course that includes sustainability components in the academic year 2016/17. (UG)
- An integrative course for detailed study of current issues in hospitality, event management and tourism with emphasis on unique case studies. (UG)
- Students will gain introductory skills in policy analysis, street level politics, and community organizing for social change. (UG)
- An introduction to interrelationships among the physical elements of the environment, including the study of weather, climate, ecosystems, and landscapes. (UG)
- Students will apply this analysis to using existing instructional materials, in addition to developing personal materials and lessons for outdoor programming. (UG)
- We discuss various methods for teaching sustainable practices such as Leave No Trace Principles. (UG)
- Current trends in training and development will be covered including computer based training, competency based training, and needs analysis. (UG)
- Sociological/anthropological analysis of selected population trends, problems and controversies in the contemporary world. (UG)
- This course will focus on fundamental issues in the modern globalization of business. The topics covered will include the cultural, political, and economic challenges of doing business in a globalized world. (UG)
